

Covertina
SINCE 1963

COMPANY PROFILE

History

Covertina Co.

Established in 1963 , Covertina is a pioneer ancient Egyptian company in the confectionery business. We started with one factory in Cairo which was inaugurated by three brothers , then in 1978 we moved out to Tenth of Ramadan City , and recently in El Obour City .

In El Obour factory, we installed new production lines of chocolate as well as a new production line of cake , to satisfy the various tastes and habits, and to meet the revolutionary manufacturing of Sweets and Chocolates.

No one can imagine any festival in Egypt unless Covertina Products are in hands .

In late 60's & 70's ... whenever COVERTINA PRODUCTS are mentioned in any occasion, every Egyptian Citizen recalls the famous advertisement of Covertina Products where it is a MUST for any bride to receive Covertina products first in condition to accept the proposal of a bridegroom.

Through continuous research and development, throughout the past 30 years, Covertina has managed to export its products to different regions.

With our commitment to research , development and success, we are confident that the next 10 years will witness positive leap to the company that in turn , will provide greater benefits to our clients.

Quality

Covertina , focus not only on Quality – Control measures, but on our staff needs by applying policies and incentives through a professional human resources department. At Covertina , the quality of product begins with highly qualified calibers .

National and Foreign Exhibitions

At Covertina , we are keen to participate in all National and Foreign specialized exhibitions all over the world. It is not only a big chance to enlarge our customers database, but to meet our current customers in person.

Also, it is a great opportunity to launch our new products.

Since we have faith in the fact that every country has its own habits and its consumer is oriented to brand loyalty, so, we are tailor made to design PRIVATE LABELS in terms of size, flavors, ingredients or shapes of products.
